## Summary

---

AI Research Scientist and Ph.D. candidate specializing in computational drug discovery and machine learning, with proven expertise in developing novel architectures for Transformers and Graph Neural Networks. Led groundbreaking research at Johnson & Johnson, developing HELM, the first mRNA antibody language model. Published extensively in top-tier venues with focus on algorithmic fairness, drug-target interaction prediction, and innovative AI methodologies. Demonstrated track record of translating complex research into practical applications, combining deep technical knowledge with strong collaborative abilities across academic and industry settings. Proficient in large-scale distributed systems and experienced in implementing production-ready AI solutions.

## Skills

---

**Programming Languages:** Python, Dart, JavaScript, C++, C#, SQL, Solidity, MATLAB

**Python Packages:** Pytorch, Numpy, Pandas, Keras, TensorFlow, Scikit-learn, Scipy, Networkx, iGraph, dgl, matplotlib, seaborn

**JavaScript Frameworks:** Vue.js, Electron, NativeScript

**Tools:** Kubernetes, Docker, Git, HTML, CSS, LATEX, AWS, Slurm

**Quantitative Research:** Machine Learning Methods, Artificial Intelligence, Large Language Models, Generative AI, Genomics Sequence Modeling, Drug Discovery, Graph Neural Networks, Transformers, Recurrent Neural Networks, LSTMs, Mathematical Optimization, Mathematical Modeling

**Soft Skills:** Research team coordination, Student mentoring, Technical writing, Conference presentations, Resource allocation, Strategic planning, Analytical thinking, Complex problem resolution, International team collaboration, Multicultural communication, Self-directed learning, Professional networking

## Education

---

**University of Central Florida**

*PhD in Computer Science*

*Jan 2021 – Aug 2025*

- GPA: 3.94/4.0

**University of Central Florida**

*MS in Computer Science*

*Jan 2021 – Aug 2023*

- GPA: 3.9/4.0

**Sharif University of Technology**

*MS in Industrial Engineering*

*Sept 2017 – Dec 2019*

- GPA: 3.88/4.0

**Isfahan University of Technology**

*BS in Industrial Engineering*

*Sept 2013 – Sept 2017*

- GPA: 3.58/4.0

## Research Experience

---

**Graduate Research Assistant**

*University of Central Florida*

*Orlando, FL*

*Aug 2021 – present*

- Conducted advanced research in computational drug discovery, focusing on drug-target interaction and algorithmic fairness.
- Developed and implemented machine learning models, including Transformers and Graph Neural Networks,

for computer vision applications.

- Collaborated on multiple interdisciplinary projects, contributing to the advancement of AI methodologies in drug discovery.
- Published research findings in reputable journals and presented them at international conferences.
- Utilized tools such as Pytorch, TensorFlow, and Scikit-learn to develop and evaluate innovative algorithms.
- Engaged in data analysis and model optimization to enhance prediction accuracy and computational efficiency.
- Assisted in mentoring undergraduate and graduate students and contributed to the academic community through collaborative efforts and knowledge-sharing sessions.

## Data Science Intern, AI/ML for Drug Discovery

May 2024 – Nov 2024

Johnson & Johnson (Janssen R&D)

- Developed and trained HELM (Hierarchical Encoding for mRNA Language Modeling), the first mRNA antibody language model, achieving up to 8% increase in prediction accuracy and enabling the generation of more diverse and biologically plausible sequences.
- Explored alternative attention architectures such as Mamba and Hyena, enhancing transformer model efficiency and effectiveness in processing mRNA sequences.
- Implemented large-scale distributed training on Kubernetes, resulting in significant reduction in training time for LLMs on extensive datasets, optimizing resource utilization and scalability.
- Collaborated with cross-functional teams to refine and deploy advanced LLM architectures, enhancing model accuracy and efficiency for large-scale data processing tasks.

## Selected Publications

<b>HELM: Hierarchical Encoding for mRNA Language Modeling</b>	2024
Mehdi Yazdani-Jahromi, Mangal Prakash, Tommaso Mansi, Artem Moskalev, Rui Liao <a href="https://arxiv.org/abs/10.48550/arXiv.2410.12459">10.48550/arXiv.2410.12459</a>  (Submitted to ICLR 2025, Neurips 2024 Workshop on AI for New Drug Modalities)	
<b>Fair Bilevel Neural Network (FairBiNN): On Balancing fairness and accuracy via Stackelberg Equilibrium</b>	2024
Mehdi Yazdani-Jahromi, Ali Khodabandeh Yalabadi, AmirArsalan Rajabi, Aida Tayebi, Ivan Garibay, Ozlem Ozmen Garibay <a href="https://arxiv.org/abs/10.48550/arXiv.2410.16432">10.48550/arXiv.2410.16432</a>  (Neurips 2024)	
<b>FragXsiteDTI: an interpretable transformer-based model for drug-target interaction prediction</b>	2024
Ali Khodabandeh Yalabadi *, Mehdi Yazdani-Jahromi *, Niloofar Yousefi, Aida Tayebi, Sina Abdidizaji, Ozlem Ozmen Garibay <a href="https://arxiv.org/abs/10.1007/978-1-0716-3989-4_5">10.1007/978-1-0716-3989-4_5</a>  (Recomb 2024 (Oral), Neurips 2023 Workshop on New Frontiers of AI for Drug Discovery and Development)	
<b>Through a fair looking-glass: on mitigating bias in image datasets</b>	2023

## Academic Services

---

Reviewer of Journal Briefings in Bioinformatics

Reviewer of Computational and Structural Biotechnology Journal

Reviewer of IEEE Transactions on Neural Networks and Learning Systems Journal

Program Committee Member of AAAI Artificial Intelligence for Social Impact 2025.

## Development Experience

---

### Blockchain Developer

June 2020 – Dec 2020

ZTech Team

- Developed blockchain applications on the Ethereum network using **Solidity**, including implementing ERC20 token standards and smart contracts for financial ICOs.

### Lead Software Developer

Jan 2019 – Dec 2020

BerimCafe

- Developed software for cafe and restaurant management with **Django** and **Flutter**.

### Lead Software Developer

Jan 2019 – Mar 2020

TAEPO

- Created TOEFL Online Practice and Exam Platform using **Django**, **Vue.js**, and **Electron.js**.

### Lead Software Developer

Feb 2018 – Dec 2019

MrZoro.ir

- Developed an automated solution for reserving meals in university, a **Django** based project.

## Awards

---

30000 dollar Amazon Research Credit Award for CoViT project

2023

Nominated for Order of Pegasus award

2023

Invited to Golden Key International Honor Society

2022

Outstanding Graduate Fellowship University of Central Florida

2021

Ranked 1st among 25000 competitors in Iranian national entrance exam for M.Sc. of industrial engineering

2017

Ranked 2nd in “Kharazmi” national Prize for Programming

2012

## Projects

---

**DeepDrugDomain:** Easy-to-use drug-target affinity/interaction prediction package for architecture design

- Developed an open source **Python package** for drug-target affinity/interaction prediction using deep learning models, including **transformers** and **graph neural networks**, for computational drug discovery.
- Implemented a user-friendly API for easy-to-use drug-target affinity/interaction prediction.
- Published on [GitHub](#) [🔗](#)

### COVID-19 Data Collection and Screening Project

- Initiated and led an open-source, pro bono project for COVID-19 data collection and screening, utilizing technologies such as **Python**, **Django**, and **PostgreSQL** for *backend* development [link](#) [🔗](#), and **JavaScript**, **Vue js** for *frontend* development [link](#) [🔗](#), to support public health efforts during the pandemic.

## Cache Simulator

- Developed a cache simulator to evaluate the performance of different cache management strategies, including LRU, FIFO, and LFU. Implemented in **C++**.

## Certificates

---

### Machine Learning Specialization

2024

- Stanford University and DeepLearning.AI - [link](#) 

### Python Fundamentals

2018

- Tehran University - [link](#) 

### Advanced Python

2018

- Maktabkhooneh - [link](#) 

## Languages

---

**English:** Fluent

**Farsi:** Native

**French:** Elementary
